## Important Dates to Remember!

May 12th (Sunday) Mother's Day

May 27th (Monday), Memorial Day Holiday  
(BICCC CLOSED)

BICCC is proudly sponsored by:

## A Heartfelt Thank You!

Thanks to everyone who came and celebrated the Kitsap Great Give Party on Tuesday (April 11th). While we don't have an accurate head count, an estimated 100 individuals joined us for wine, cheese and excellent music. It was a wonderful way for parents and children alike to meet new people and to get reacquainted with those they haven't seen in a while. For me, it was particularly gratifying and humbling to see parents who were part of the program years ago now bringing their children.

As always your continued support and interest in our organization from our friends, families and the community is so very much appreciated. Without it we would not be here.

## Reminder: Summer 2024 Registration!

Our Summer Descriptions and Summer Registration packets are ready and are available for pick up, emailed to your home or you can download them online through our web site. Kids Club has a another great line up this year bringing back some old favorites and trying on new themes and activities. There is sure to be something for everyone. As of May 1st, registration will be open to the public.

Fall 2024/2025 registration packets are on their way as well. We will keep you posted on their release date.

If you are interested in receiving enrollment forms, please give Bridgette Springer or myself a call at 206-842-0238 or 206 780-1421 (Kids Club), and we will put you down on our mailing list.

## What's Happening!

The April showers not only brought us flowers, but pretty amazing and educational themes to boot!

Architectural Marvels, Bridges had our kids building arched bridges much like the early Romans did. Our STEM drawbridge project got those creative wires firing and then throw in Monet's Water Lily Garden (there's a bridge in it) and you have a successful week!

Architectural Marvels, Canals focused on the history and importance of these water way systems to our economy, had kids building their own canals using foil, cut plastic bottles and cardboard; and just for fun, imitated nature by building beaver dams on giant cookie sheets.

Can't wait to see what's in store for the month of May!

Until Next Month! Brigitte, and Joe
